BUSINESS PROPOSAL – INFECTION CONTROL SOLUTION PLAN™ (ICSP)

Dear Sir/Madam,

Lysoform® Thank you for giving us the opportunity to quote for Lysoform® services. Lysoform® is honored to present its hygienic program against germs through offering a high quality service and a long lasting protection to the most sensitive areas in our living, working and public places.

ABOUT LYSOFORM®

- Lysoform - known worldwide as one of the major disinfectant brands since 1900. Lysoform - behind this name is a group of companies, a house of committed people and full of ideas on the diverse topic of hygiene.
- Lysoform - a trademark for disinfectants and an artificial word that has been noted in the dictionary as a synonym for disinfection for decades. Lysoform - generally means hygiene, cleanliness and health.
- So that you can get to know the people and their ideas that shaped and shape Lysoform better, "Here is an overview of a house" in Germany - with a look back at a long tradition and with a view of a successful future.

OUR GOAL

To prevent the transmission of infectious diseases.

Find problem solutions for our customers: Responding, analyzing information, advising, helping, managing/arranging solutions.

To keep the product range of the house in line with the current state of scientific development with regard to its effect as well as skin, material and environmental compatibility.

3			

INFECTION CONTROL SOLUTION PLAN™ (ICSP) STEPS OF APPROACH

Lysoform® targets all types of germs found on surfaces and in the air. The steps and frequency of the treatment that will be implemented in your premises are as follows:

INSPECTION

Inspection of the area to be treated in order to determine the contamination sources.

RECOMMENDATIONS

Based on the inspection's outcome, recommendations on steps to be taken before and after the ICSP™ treatment as well as preventive measures for long-term protection are provided to the client.

Cleaning and disinfecting are two firmly linked operations in a way that result will not be optimal if both processes were not conducted properly. Different points are part of good sanitation practices:

1. Proper waste disposal system.

2. Adequate cleaning of the area.

3. Routine sanitation of frequently touched surface.

TREATMENT

Depending on each case, a customized disinfecting plan including specific treatment intervals is implemented in the facility for the purpose of treating, controlling or preventing the multiplication of germs to an unsafe level.

MONITORING & FOLLOW-UP

Regular follow-up and monitoring to insure efficiency of treatment and satisfactory outcomes.

WHY CHOOSE LYSOFORM®?
